

ENZO T1

Bergamo fabric finish

RRP

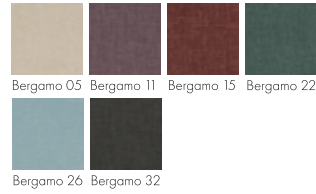

335 EUR

Bergamo fabric is stain resistant, easy to clean, and extremely durable. It stands as proof that environmentally-responsible products can stand at the forefront of performance fabric design.

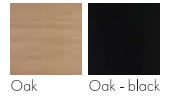

Bergamo fabric

Composition - 100% Polyester
Durability - 100 000 Martindale

Natural bent glued plywood, available in lacquered oak finish or oak veneer painted black.

Wooden handle

ENZO T2

Wooly fabric finish

RRP

378 EUR

The Wooly fabric is woven from recycled wool. This wool comes from clothing production residues or other recycled wool products. Wool fabric is strong, hard-wearing, and naturally flame-retardant.

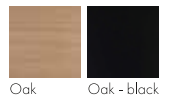

Wooly fabric

Composition - 70% wool, 25% polyamide, 5% mixed fibers
Durability - 150 000 Martindale

Natural bent glued plywood, available in lacquered oak finish or oak veneer painted black.

Wooden handle

ENZO T3

Oxford fabric finish + leather top

RRP

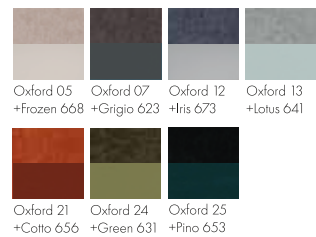

397 EUR

Explore this sumptuous combination of richly-colored velvet fabric and soft, semi-matt natural leather top. Oxford fabric is particularly hard-wearing and durable but designed to look and feel like cotton velvet.

Oxford fabric + Leather

Fabric composition: 100% Polyester
Fabric durability: 100 000 Martindale
Leather composition: 100% Natural half-grain cowhide

Natural bent glued plywood, available in lacquered oak finish or oak veneer painted black.

Wooden handle

ENZO T4

Leather finish

RRP

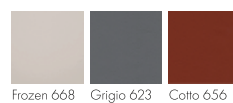

714 EUR

Linea semi-aniline natural leather is coated with a pigmented light surface coating. This extra layer gives the leather its uniform color and durability. Semi-aniline leather is water-resistant and has a protective layer against spills.

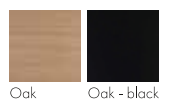

Linea natural leather

100% Natural half-grain cowhide
Finished thickness: 0.8 - 1.0 mm

Natural bent glued plywood, available in lacquered oak finish or oak veneer painted black.

Wooden handle

DESCRIPTION

Enzo pouf elegantly reflects the ability to combine high-quality production materials with the latest technology and meticulous craftsmanship. Every production element of the pouf effectively complement each other, creating a product that serves as a unique addition to any room. Enzo pouf is the result of a long period of research and development work, where the main goal was to find the perfect combination that will distinguish both form and functionality.

TECHNICAL SPECIFICATIONS

The foot of the pouf is made of 16mm medium density fiberboard. Its shape is formed by a wooden frame, in combination with pressed furniture cardboard. The pouf upholstery is constructed of the highest quality PPU foam, anti-allergic synthapone, and the chosen finishing material. The handle is made of bent glued oak veneer, available in lacquered oak finish or oak veneer painted black.
